SPECIAL PROCESSING

If the licensee requires special processing, please contact the ESRGC to receive a quote for the service. Examples of special processing would include: spatial clipping, reprojection (by default, all datasets are in Maryland State Plane Coordinate system, NAD 1983), and other data manipulation. The cost of these services can vary greatly depending on the extent of the requested modifications.

HOW TO ORDER:

Order forms may be found at the ESRGC website (www.esrgc.org) as well as index maps of the County's spatial data tiles.
